SESSION ID: #006304

MODE: Live Optical Sensor

HEART RATE

85 BPM

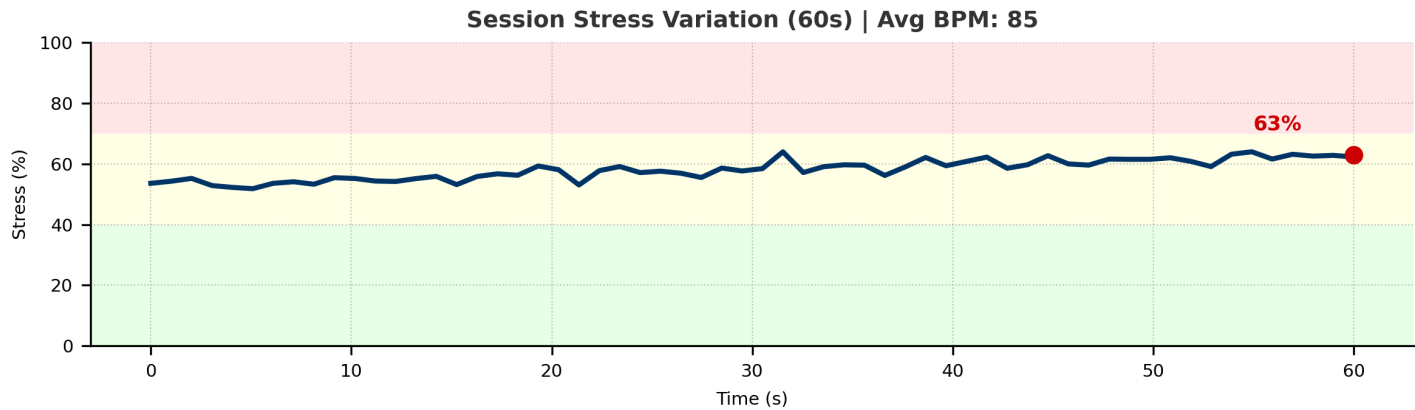

STRESS LEVEL

63 %

STATUS

ELEVATED

SESSION VISUALIZATION

AI CLINICAL ASSESSMENT

Assessment: Normal Physiological Function. Your stress levels are within the normal range for daily activity. While not elevated, brief moments of focus were detected. This indicates a healthy, adaptive response to your environment.

RECOMMENDATION: Maintain regular breathing. Continue monitoring if stress persists.
